HOLY ANGEL UNIVERSITY
SCHOOL OF COMPUTING

6CFUN/6EMC
First Semester, SY 2022-2023

Name: Redenelle Maurice L. Manangu	Student No.:20961134
Activity: **Asynchronous Activity**	Section: ICT - 105
Topic: **Computing Industry**	Week: **2**
Remarks:	Score:

General Instructions:

- Read Module 1: Computing Industry
- Do the following specific instructions below
- Submit your assignment on the specified submission date on Canvas
- This is equivalent to 30 points

Specific Instructions:

- Answer the following questions based on your **Specialization**

A. Computer Science

1. What would you like to have as a career after you finish college? And why? (5 points)
    a. Software Engineer
    b. Data Analyst/Architect/Scientist
    c. Quality Analyst
    d. Database Administrator/Analyst
    e. Computer Systems Analyst
    f. Business Intelligence Analyst
    g. Others, please specify: Computer Programmer

Answer: After I graduate from college with a Bachelor of Science in Computer Science, I believe I want to work as a computer programmer, with Web development as a secondary option. Why become a computer programmer? Because I am more interested in solving real-world problems, which will help me develop an understanding of how things work, and because computer programmers have a variety of languages that can be used to create software that helps or fulfills the needs of the industry, In computer programming you are always learning new things from different languages that you use.

2. Three years from now you will be proposing a topic for your thesis/capstone, what area would you like to explore and why? (5 points)
    a. Academe
    b. Environment
    c. Transportation
    d. Health
    e. Humanity

f. Business and Commerce
g. Others, please specify: _____

Answer: The environment is the focus of my attention. Our environment is facing a lot of problems these days, and as a student, I want to use my knowledge to build or think of a software program that solves some of those problems, such as developing a monitoring system, websites that promote helping the environment, tracking and managing resources, and so on.

3. In relation to the previous question, what contribution do you think would it give to the community? Explain or expand your answer (10 points)

Answer: We can gain from becoming more engaged in addressing problems in our environment as we become more conscious of the situation. A healthy living environment is safe and appealing, encourages people to interact with one another, promotes healthy behaviors, and is enjoyable to live in. We may gain as a community by living in clean, healthier circumstances, enhancing our quality of life as a result of a better environment, utilizing resources wisely, and providing more chances for our society. Many individuals and future generations can fulfill their own needs and will greatly benefit from a cleaner and healthier environment.

4. How would you use your chosen career in your future endeavor at work? (10 points)

Answer:

I will do everything to learn more about my career path, as it will help me in the future. I am motivated to do everything that I can, or I will push myself to my limit just to be better at my job. I will set goals every day to develop new skills beyond my current position by focusing on my skills and improving them. I want to improve soft skills like Analytical thinking, Problem-solving, and Critical thinking. These three skills are important to learn. As we progress in our environment, we must practice more and more to better comprehend and master it. In terms of technical skills, I wish to increase my coding and programming abilities; how can I do so? Reading and creating codes to help us recall coding approaches and concepts can help us improve our programming abilities. Solving problems and being open to new experiences might help me develop my coding abilities. Learn new technologies and be interested in developments in technology to improve your coding abilities. As I follow these behaviors, I will become more productive, efficient, and a good worker. Finally, always seek the assistance of your instructor or mentor.
