A Tracer Study of Bachelor of Science in Accountancy (BSA) Graduates from 2014 to 2019, Systems Plus College Foundation

Mr. Gian Carlo N. Catahum

Abstract:

The study is a mechanism to determine the gap between what the educational institution produce and what the industry needs with respect to the evaluation and satisfaction level of the graduates. The study was conducted to determine the employability of the BSA graduates of SPCF from 2014 to 2019. This also aimed to determine the relevance of the curriculum and study program, the practices at BSA and the competencies that helped the graduates land a job and how they are useful in their jobs.

There were 94 graduates that participated on the study out of the 103 graduates from 2014-2019. Questionnaire was administered to the respondents by students, and faculty staff of BSBA Department. The data gathering was a concerted effort of alumni, faculty staff, students and student leaders to the extent of using social media to reach out to the target respondents. The data generated were analyzed and interpreted using simple statistical tool as percentages and results were presented in tables.

It found out in the study that 89.4% of the respondents gained employment. Significantly, sizable number of graduates acknowledged that curriculum, study program and practices at BSBA were useful in their jobs. It was also established that referral system is still a reliable and effective way of landing a job for the graduates.

It was also find out that for the graduates to be more competitive and employable the following areas needs to be strengthened as follows: entrepreneurial skills, communication skills, problem and decision making skills, language proficiency and information communication technologies (ICT) skills. It is highly recommended also to institutionalize further the establishment of linkage to industry partners in Angeles City and Pampanga.

Questionnaire ----------

Chapter 1

Introduction

SPCF envisions itself to become a leading and globally competitive educational institution in the fields of instruction, research and community service. The study enlightened the school authorities and its faculty and staff through knowing the present employability of its graduates at the BSA Department.

The findings of the study were an important tool and resource material for the institution and its students and graduates. The study mapped out the path towards alignment of course offerings, crafting strategies and methodologies that suit to the needs of the industry given the ever-changing and highly volatile needs and specifications of the job market. This also been an eye-opener for the school authorities in the provision of needed resources and services for the students to more competitive in an increasingly technological and global labor market competition.

Chapter 2

Problem of the Study

What is the employability rate of SPCF BSA graduates of 2014-2019?

This study aimed to provide facts and information intended to make the institution realize the employability rate of BSA graduates from 2014 to 2019. This study further determined the effectiveness of the BSA programs, curriculum and the methodologies as well as the whereabouts and the present situation of the graduates. The findings of this study can help the institution in its curriculum development and review to upgrade the knowledge skill and abilities needed by its students in consonance with requirements of the industry, or the labor market, thus assuring the graduates of higher chance of employment.

Objectives:

The study aimed to:

a. determine the employment/unemployment rate of SPCF graduates;
b. ascertain the reasons for graduates' unemployment;
c. determine how long graduates could land a job after graduation;
d. determine the sources for finding a job;
e. discover the reasons for a graduates' staying on the job;
f. ascertain the competencies learned in college, which graduates found very useful; and
g. determine which BA related activities they practiced in their jobs.

Chapter 3

Research Methodology

Sampling Plan

The respondents of the study comprised mainly of SPCF, BSA graduates from 2014 to 2019.

Sampling Size

There were 112 graduates from the BSA Department from 2014-2019 where all graduates were considered as the research sample; hence, total enumeration was employed.

Research Instrument and Technique

A survey questionnaire was devised to gather vital information for the study. The Questionnaire had been designed in a way the respondents could easily understand what is being asked.

Data Gathering Procedure

The researcher sought the help of the school administration, the registrar's office, Office of external affairs, research and development office, Alumni Office, COB Dean's Office and Student organization who had established network or linkage with the graduates of the BSA Department.

The faculty members of the BSA Department, the researcher sought cooperation of the students, who served as research enumerators for the study. The researcher had selected presently enrolled students and members of the student organization of the department to help in the generation of needed data.

Administration of research instruments was given from the start of First Semester, School Year 2019-2020 upon pre-testing and validation of materials. The date of retrieval was at the end of August to come up with the final result and the presentation was before the end of the First Semester, SY 2019-2020.

Statistical Treatment

The data generated were tallied, tabulated, analysed and treated statistically.

Results were treated through frequency, percentages and presented using tables and pie charts.

Chapter 4

Results and Discussion

The intensive gathering of data involved students who are taking research, feasibility studies and student leaders under the JPIA. The faculty members were also sought to tracked and re-establish connection and linkages with their former students. The study sought also the assistance of alumni to facilitate the gathering of data.

There were 94 students who had responded on the study out of the 103 graduates from School Year 2014 to the end of SY 2019. It shows that 83.9% had responded on the survey. There were 28 males out of 33 who responded which is equivalent to 84.84 % and 66 female out of 79 had responded which is 83.54%

Number of Graduates and Participants

Gender	Number of Graduates	Percentage	Number of Participants	Percentage on # of Graduates
Male	33	29.36	28	84.84%
Female	79	70.64	66	83.54%
Total	112	110 %	94	83.92%

Table 1 indicates that the greater majority of the respondents were male (55%) and single (58%) with an average age of 23.77 years old (*SD* = 1.890).

Table 1:

		Male	Female	Total
Civil Status	Single	34 (60%)	26 (57%)	60 (58%)
	Married	16 (28%)	14 (30%)	30 (29%)
	Single Parent	3 (5%)	4 (9%)	7 (7%)
	Married but not living with spouse	4 (7%)	2 (4%)	6 (6%)
	Total	57 (55%)	46 (45%)	103 (100%)
	Mean age	23.767		
	Standard deviation	1.890		

According to Table 2, most participants graduated in academic year 2015-2016 (29%), 2017-2018 (27%), and 2014-2015 (25%) with the degree of Bachelor of Science (BS) in Accounting Technology (76%).

Academic year 2015-2016 had the highest concentration of BS Accounting Technology graduates (28%), followed by academic year 2016-2017 (26%) and 2014-2015 (24%). On the other hand, academic years 2015-2016 and 2016-2017 both obtained the highest percentage (32%) of BS Accountancy graduates, followed by academic year 2014-2015 (28%).

Table 2:

		BS Accounting Technology	BS Accountancy	Total
Year Graduated	AY 2014-2015	19 (24%)	7 (28%)	26 (25%)
	AY 2015-2016	22 (28%)	8 (32%)	30 (29%)
	AY 2016-2017	20 (26%)	8 (32%)	28 (27%)
	AY 2017-2018	7 (9%)	2 (8%)	9 (9%)
	AY 2018-2019	10 (13%)	0 (0%)	10 (10%)
	Total	78 (76%)	25 (24%)	103 (100%)

Table 3 indicates that majority of the respondents had attained their degrees from Systems Plus College Foundation (96%). On the other hand, the remaining 4% pursued their accountancy degree in other institutions -- Our Lady of Fatima University and Manuel L. Quezon University.

Table 3:

	Systems Plus	Our Lady of	Manuel L.	Total

		College Foundation	Fatima	Quezon	
Year Graduated	AY 2014-2015	25 (25%)	1 (50%)	0 0	26 (25%)
	AY 2015-2016	29 (29%)	0 (0%)	1 (50%)	30 (29%)
	AY 2016-2017	27 (27%)	0 (0%)	1 (50%)	28 (27%)
	AY 2017-2018	8 (10%)	1 (0%)	0 (0%)	9 (9%)
	AY 2018-2019	10 (10%)	0 (0%)	0 (0%)	10 (10%)
	Total	99 (96%)	2 (2%)	2 (2%)	103 (100%)

Table 4 indicates that majority of the respondents who took professional examinations passed the CPA Licensure Examination (23%) with an average rating of 80.92 (*SD* = 1.692), Licensure Examination for Teachers (5%) with an average rating of 88.20 (*SD* = 1.788), and Civil Service Examination (4%) with an average rating of 84.50 9*SD* = 2.517).

Table 4:

		Frequency	Rating	Standard Deviation
Professional Examination Taken	CPA License Examination	24 (23%)	80.917	1.692
	Licensure Examination for Teachers	5 (5%)	88.20	1.788
	Civil Service Examination	4 (4%)	84.50	2.517
	Did not take	70 (68%)	n/a	n/a
	TOTAL	103 (100%)		

Table 5 indicates that majority of the respondents pursued their chosen undergraduate degrees due to their prospect for immediate employment (90%), perceived status or prestige of the profession (90%), prospect for career advancement (85%), high grades in the course or subject related to the course (74%), and influence of their parents or relatives (65%).

Majority of the respondents also cited the same reasons for pursuing graduate studies: prospect for immediate employment (91%), status or prestige of the profession (91%), prospect of career advancement (82%) and high grades in the course or subject areas related to the course (74%). However, prospect of attractive compensation was proven to be a more convincing reason for pursuing graduate studies (55%), instead of parental or relative influence.

Table 5:

		Undergraduate	Graduate
Reasons for pursuing the degrees	High grades in the course or subject area/s related to the course	76 (74%)	8 (73%)
	Good grades in high school	48 (47%)	5 (46%)
	Influence of parents or relatives	67 (65%)	9 (2%)

	Peer influence	19 (18%)	1 (9%)
	Inspired by a role model	12 (12%)	1 (9%)
	Strong passion for the profession	18 (18%)	1 (9%)
	Prospect for immediate employment	93 (90%)	10 (91%)
	Status or prestige of the profession	92 (90%)	10 (91%)
	Availability of course offerings in the chosen institution	38 (37%)	5 (46%)
	Prospect of career advancement	88 (85%)	9 (82%)
	Affordable for the family	22 (21%)	2 (18%)
	Prospect of attractive compensation	69 (67%)	6 (55%)
	Opportunity for employment abroad	21 (20%)	2 (18%)
	No particular choice or no better ideas	21 (20%)	2 (18%)
	TOTAL RESPONSES	103	11

Table 6 indicates that majority of the respondents were employed at the time of the survey (88%). On the other hand, 9% of the respondents indicated that they were unemployed and 3% reported that they were never employed at the time of the data gathering period.

Table 6:

	Frequency	Valid Percentage
Employed	91	88%
Not employed	9	9%
Never employed	3	3%
TOTAL	103	100%

Table 7 indicates that majority of the respondents who were not employed at the time of data gathering reported health-related reasons (44%) and no job opportunity (33%) as reasons for their unemployment. Moreover, lack of work experience and family concerns were also cited as significant reasons as each obtained 22% of the responses.

On the other hand, those who were never employed at the time of the survey reported health-related reasons (67%) and lack of work experience (33%) as major reasons why they never got to work.

Table 7:

		Not employed	Never employed
Reasons for unemployment	Pursuing advanced or further studies	1 (11%)	0 (0%)
	Family concerns, decided not to look for job	2 (22%)	0 (0%)
	Health-related reasons	4 (44%)	2 (67%)
	Lack of work experience	2 (22%)	1 (33%)

No job opportunity	3 (33%)	0 (0%)
Did not look for a job	0 (0%)	0 (0%)
Other reasons	0 (0%)	0 (0%)
TOTAL RESPONSES	9	3

Table 8 indicates that a huge majority of those who were employed at the time of the survey were on regular or permanent status (63%). Most of them were employed in business process outsourcing (BPO) companies as customer representatives, outsourced accountants and administration personnel in retail companies, while a number of respondents reported to be working in accounting firms in Manila and Makati.

Table 8:

	Frequency	Valid Percentage
Regular or permanent	57	63%
Temporary	9	10%
Contractual	19	21%
Self-employed	4	4%
Casual	2	2%
TOTAL	91	100%

Table 9 indicates that majority of those who were employed at the time of the survey were working in wholesale and retail (39%) and business process outsourcing (35%). As noted earlier, the respondents reported that they were employed as customer representatives, outsourced accountants and administration staff in BPOs, and accounting and administration personnel in retail firms.

Table 9:

	Frequency	Valid Percentage
Business Process Outsourcing	32	35%
Manufacturing	6	7%
Education	11	12%
Wholesale and Retail	36	39%
Information Technology	6	7%
TOTAL	91	100%

According to Table 10, majority of the respondents reported to be working locally (86%), while the rest were employed abroad (14%) at the time of the survey.

Table 10:

	Frequency	Valid Percentage
Local	89	86%
Abroad	14	14%
TOTAL	103	100%

Table 11 indicates that majority of the respondents stated that their current job was their first job since college during the data gathering period (75%). On the other hand, the rest (25%) reported otherwise.

Table 11:

	Frequency	Valid Percentage
First job	77	75%
Not the first job	26	25%
TOTAL	103	100%

Table 12 indicates that majority of those who stated that their current job was not their first employment reported that their first job was not related to their course in college (54%).

Table 12:

	Frequency	Valid Percentage
First job aligned to course	12	46%
First job not aligned to course	14	54%
TOTAL	26	!00%

Table 13 indicates that majority of those who reported that their current job was not their first employment since college perceived that their current job was aligned to their course (54%).

Table 13:

	Frequency	Valid Percentage
Current job aligned to course	14	54%
Current job not aligned to course	12	46%
TOTAL	26	100%

Table 14 indicates that the most cited reason for changing jobs was salaries and benefits (89%), proximity to residence (58%), and relation to special skills (42%) of their current job.

Table 14:

Reasons	Frequency	Percentage
Salaries and benefits	23	89%
Career challenge	6	23%
Related to special skills	11	42%
Proximity to residence	15	58%
TOTAL RESPONSES	26	

Table 15 indicates that the most cited reason for staying on the job by those who reported their first employment as their first job were proximity to residence (70%), salaries and benefits (60%), and family influence (57%).

Table 15:

Reasons	Frequency	Percentage
Salaries and benefits	46	60%
Career challenge	18	23%
Related to special skills	23	30%
Related to course	18	23%
Proximity to residence	54	70%
Peer influence	16	21%
Family influence	44	57%
TOTAL RESPONSES	77	

Table 16 indicates that the majority of those who were currently working for their first employer reported that their job was related to their course in college (62%).

Table 16:

Reasons	Frequency	Percentage
Job related to course	48	62%
Job not related to course	29	38%
TOTAL	77	100%

Table 17 indicates that those who were currently working for their first employer identified proximity to residence (70%), and salaries and benefits (69%) as their primary reasons for staying in their job.

Table 17:

Reasons	Frequency	Percentage
Salaries and benefits	53	69%
Career challenge	23	30%
Related to special skills	25	33%
Proximity to residence	54	70%
TOTAL RESPONSES	77	

According to Table 18, majority of the respondents stayed in their first job for 1 year to less than 2 years (32%), followed by those who stayed for 7 to 11 months (29%)..

Table 18:

Duration	Frequency	Valid Percentage
Less than a month	2	2%
1-6 months	7	7%
7-11 months	30	29%
1 year to less than 2 years	33	32%
2 years to less than 3 years	19	18%
3 years to less than 4 years	10	10%
4 years to less than 5 years	2	2%
TOTAL	103	100%

According to Table 19, majority of the respondents had stayed in their current job for 1 year to less than 2 years (34%), followed by those who had stayed for 7 to 11 months (25%), and 1 to 6 months (20%).

Table 19:

Duration	Frequency	Valid Percentage
Less than a month	5	5%
1-6 months	21	20%
7-11 months	26	25%
1 year to less than 2 years	35	34%
2 years to less than 3 years	14	14%
3 years to less than 4 years	2	2%
TOTAL	103	100%

According to Table 20, majority of the respondents had changed their jobs only once (83%).

Table 20:

	Frequency	Valid Percentage
Changed job once	86	83%
Changed job twice	14	14%
Changed job thrice	3	3%
TOTAL	103	100%

According to Table 21, majority of the respondents found their first job through information from friends (33%), as a response to an advertisement (29%), and as a walk-in applicant (21%).

Table 21:

	Frequency	Valid Percentage
Response to an advertisement	30	29%
As a walk-in applicant	22	21%
Recommended by someone	16	16%
Information from friends	34	33%
Arranged by school's career placement office	1	1%
TOTAL	103	100%

According to Table 22, majority of the respondents took 1 to 6 months (36%) and 7 to 11 months (31%) before landing their first job.

Table 22:

Duration	Frequency	Valid Percentage
Less than a month	19	18%
1-6 months	37	36%
7-11 months	32	31%
1 year to less than 2 years	14	14%
2 years to less than 3 years	1	1%
TOTAL	103	100%

According to Table 23, majority of the respondents held rank and file or clerical positions in their first job (91%). However, in their current job, the percentage of the respondents who held rank and file positions had slightly decreased to 86% as the number of alumni who held supervisory positions had increased from 9% to 12%, and 2 individuals (2%) were promoted to managerial positions.

Table 23:

Job Level or Position	First Job	Current Job
Rank and File/Clerical	94 (91%)	88 (86%)
Professional/Technical/Supervisory	9 (9%)	12 (12%)
Middle Management/Managerial	-	2 (2%)
TOTAL	103 (100%)	103 (100%)

According to Table 24, majority of the respondents earned 5,000 pesos to less than

10,000 pesos in their first job (78%). However, in their current job, the percentage of the respondents who earned 5,000 pesos to less than 10,000 pesos had slightly decreased to 68% as the number of alumni who earned 10,000 pesos to less than 15,000 pesos had increased from 18% to 24%, and 8 individuals (8%) reported to be earning 15,000 pesos to less than 20,000 pesos.

Table 24:

Gross Monthly Income	First Job	Current Job
Below Php 5,000	4 (4%)	-
Php. 5,000 to less than Php. 10,000	80 (78%)	70 (68%)
Php. 10,000 to less than Php. 15,000	19 (18%)	25 (24%)

A. Gender Distribution

There were 94 students who responded on the questionnaire administered of which 28 are male and 66 are female which is 29.8% and 70.2% respectively. This shows that there are more females than males who graduated at the department from 2011-2014.

		Frequency	Percent	Valid Percent	Cumulative Percent
Valid	1	28	29.8	29.8	29.8
	2	66	70.2	70.2	100.0
	Total	94	100.0	100.0	

B. Employment Status of Graduates

The table shows that 84 or 89.4% are currently are working and 10 or 10.6 are unemployed or self-employed or waiting for time to go abroad. This shows that there is a high employment rate of graduates at the BSBA Department.

		Frequency	Percent	Valid Percent	Cumulative Percent
Valid	1	84	89.4	89.4	89.4
	2	10	10.6	10.6	100.0
	Total	94	100.0	100.0	

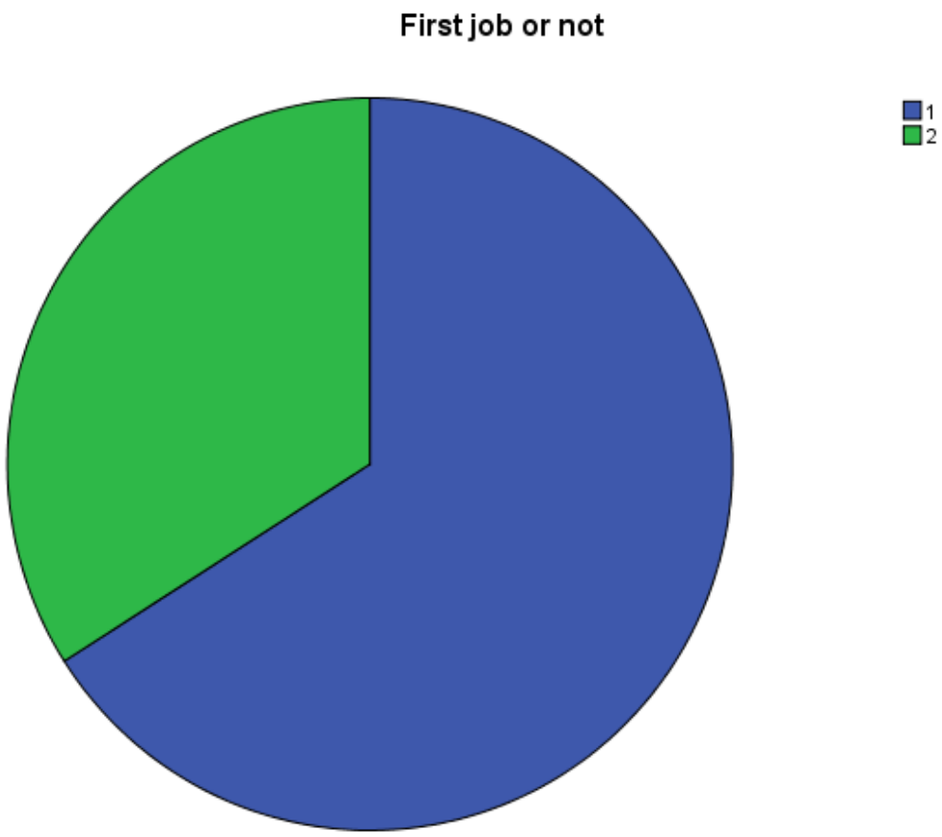

C. Job Posting

The respondents reported that 66% or 62 of the total respondents had stated that their current job is their first job and 32 of them translating into 34% acknowledged that they are now on second job or more.

First job or not

		Frequency	Percent	Valid Percent	Cumulative Percent
Valid	1	62	66.0	66.0	66.0
	2	32	34.0	34.0	100.0
	Total	94	100.0	100.0	

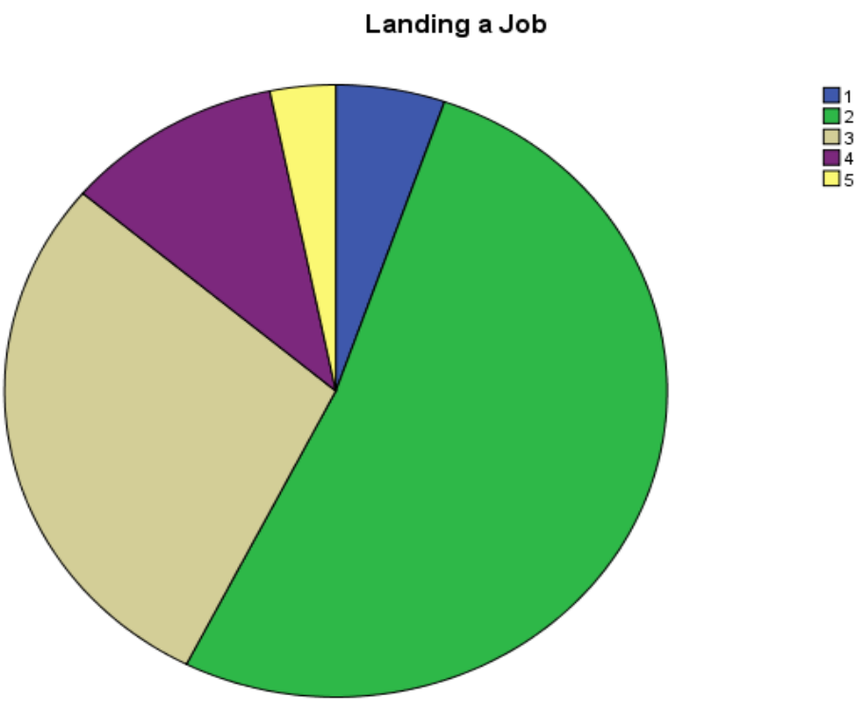

D. Time Spent Before Landing a Job

Most of the graduates stated that they get a job within 6 months which is 49 out of 94 which is 52.1%. There were 28.7% respondents reported that they got the job within a year. There 10.6% before two years after graduation. Only 5.3% reported that they have the job within one month after graduation and measly 3.2% or 3 graduates did able to get a job after two years of graduation

Landing a Job

		Frequency	Percent	Valid Percent	Cumulative Percent
Valid	1	5	5.3	5.3	5.3
	2	49	52.1	52.1	57.4
	3	27	28.7	28.7	86.2
	4	10	10.6	10.6	96.8
	5	3	3.2	3.2	100.0
	Total	94	100.0	100.0

	3	9	9.6	9.6	17.0
	4	32	34.0	34.0	51.1
	5	46	48.9	48.9	100.0
	Total	94	100.0	100.0	

Chapter 5

Conclusion and Recommendation

It can be noted that from among the 94 respondents that accounts to 83% of the total BSBA graduates from 2011 to 2014, there were 89.4% or 84 graduates had gained employment or currently working. Notably, 66% are still connected with their first job which explains that there is a high level of satisfaction on their current jobs.

More than 52% reported that they land a job within six months after graduation and almost 30% got a job before one year. Hence, employability of the graduates was very high. It was acknowledged by the graduates that referral from people related from SPCF and to SPCF itself had greatly been the reason why they were employed. Job fair and walk in application was also widely acknowledged.

The reason on unemployment still perceived by handful respondents as they lack connections and they lack experience and still contested that there was no job opportunity.

It found out that the BSBA curriculum was acknowledged by 93.6% as relevant to their job. As they also stated that the competencies they gained from BSBA were useful in their job namely: customer care and customer relations, problem solving and decision making skills and communication skills. It also found out that activities gained from BSBA were practiced at their job like marketing activities, customer relations, data gathering and research, and community extension activities.

Currently, most graduates are working in Angeles City and in Pampanga. The graduates acknowledge that they are highly adaptable in their jobs. It was found out also that graduates gained experiences from their current job and shared that their study program was relevant to their job.

On the other hand, the following areas should be strengthened for the BSBA graduates to be more competitive and employable in the future, these are: entrepreneurial skills, communication skills, problem and decision making skills, language proficiency and ICT skills. It is further recommended that linkages to industries or companies within Angeles City and Pampanga should be established as they are the major labor market for BSBA Graduates.

Dear Graduates:
Good day! Please complete this Graduate Tracer Study Questionnaire (GTSQ) as accurately and frankly as possible. Your responses will be used for research purposes in order to assess graduate employability and the relevance of the curriculum content on your profession. The results of this survey will be utilized to improve the course offerings of your alma mater. Answers to this survey will be treated with strictest confidentiality. Thank you.
